

AUTOMATIC BOOM BARRIERS

FOR PUBLIC AND PRIVATE APPLICATIONS

- High performance 24 Vdc motors for intensive use
- Obstacle detection for immediate run inversion
- Available with 4, 6, and 9 meter booms
- Anti-UV orange peel powder coating
- LED-equipped for greater visibility (ALT-KP models)

Key Automation's automatic boom barriers are the ideal solution for parking lots and roadways.

Robust and efficient, these boom barriers use 24 Vdc motors for intensive, non-stop use.

Opening and closing times are a mere 3 seconds while Key Automation's latest Fastline boom barrier models open and close in as fast as 1 second.

LED lights are also integrated on the automatic boom barrier's body and arm for added safety.
