

AUTOMATIC SLIDING DOORS FOR PUBLIC AND PRIVATE APPLICATIONS

- Silent, high performance 24 Vdc motors for very intensive use
- Single automatic sliding door systems up to 160 kg
- Double (bi-parting) automatic sliding door systems up to 120+120 kg (1000+1000 mm door width)
- Full range of optional accessories

Key Automation's automatic sliding doors are designed and built for very intensive use with rated utilization of up to 100%.

Durable and efficient 24 Vdc motors drive the sliding doors' movements with Key's field-proven logic controllers capably managing functions in even the most demanding operating conditions.

Ideal for commercial establishments, offices, hospital clean rooms, and other secure areas, Key's automatic sliding doors provide hassle-free no-contact access.

Single sliding door and double sliding door systems are available with a wide range of safety sensors and actuators.
